

Carbon Reduction Plan Template

Supplier name:Barmaw.....

Publication date:19 August 2025.....

Commitment to achieving Net Zero

Barmaw committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	15
Scope 2	12
Scope 3 (Included Sources)	35
Total Emissions	62

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	13
Scope 2	10
Scope 3 (Included Sources)	32
Total Emissions	55

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 40 tCO₂e by 2030. This is a reduction of 32%

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2050 baseline. The carbon emission reduction achieved by these schemes equate to 40tCO₂e, a 35%ge reduction against the 2022baseline and the measures will be in effect when performing the contract

Transitioned to 100% renewable electricity across our offices - Reduced paper usage by 70% through digital recordkeeping - Upgraded to energy-efficient IT equipment and LED lighting - Introduced hybrid working policies to reduce staff commuting emissions

In the future we hope to implement further measures such as:

Transitioning company vehicles to electric fleet by 2028 - Expanding use of video conferencing to further reduce business travel - Engaging supply chain partners to adopt low-carbon practices - Achieving ISO 14001 certification by 2027

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Tendai Maunganidze
